

Coin counting machine  
for Mixed Cash  
with foreign coin removal  
CC 1301 Mix Counter

# CC 1301 Mix Counter even faster, even more reliable with RCDS

## Foreign coin removal

This small, handy counter is specially suited to the determining of the total amount in the case of mixed coins. With a large range of possible applications especially where the fast settling of amounts is required such as in banks and savings banks and their branch establishments directly at the cash register and in the case of persons setting up automatic vending machines. As the device can be universally programmed, its use is particularly recommended also in border areas. The setting and programming of the device is effected by 'learning'.

## Foreign coin detection by RCDS

This coin detection system developed specially by Reis (Reis Coin Detection System) measures and compares coins with a programmable tolerance value and reliably removes foreign coins - if they do not match. Every coin family and every new currency.

## Reliable, efficient cash processing

The CC 1301 Mix Counter is distinguished by extremely easy operability and low service and maintenance. A large range of accessories (e.g. outlet hopper for bag fastening, second display, sleeve tubes and sleeve tube holders) guarantees reliable, fast and time-saving cash processing. Interface for an external printer or PC is provided.

Double outlet

Foreign coin removal

Tubing coins

Coin bagging

## Technical Specifications:
